

Release Notes

Product version:

Vision and Vision Pro for Windows version 9.6.5

Release date:

October 25, 2019

Introduction

The Windows version 9.6.5 of Netop Vision and Netop Vision Pro includes new features and improvements.

Version 9.6.5 of Vision and Vision Pro do not require new license keys for 9.6 users, who are eligible to upgrade free of charge.

Customers using a version of Vision that predates 9.6 must upgrade in order to download 9.6.5. For more information on your license or to purchase an upgrade, please contact [Netop](#) or your local [Netop Partner](#).

New Features

- *Send Message*

To use this feature in a started class, click "Send Message" button from the Home tab or Shortcut Bar. The message can contain up to 200 characters and can be sent to the selected students or to all students in the classroom.

- *Snap to Grid*

This feature allows teacher to precisely align the computers in the classroom to vertical and horizontal grid lines. When the student computer thumbnail is moved/dropped close to a grid line, the thumbnail will snap to it, aligning it precisely.

- *Freeze classroom layout*

This feature allows system administrators to protect the classroom layout on a teacher computer by restoring the layout back to the saved configuration each time the application is restarted or the classroom is changed. The teacher is allowed to change the layout of the classroom, but the changes are not saved.

- *Improved support on Mozilla Firefox layout*

A specific policy (available from Firefox 60, Firefox ESR 60) is enabled to prevent students from uninstalling or turning off the Vision Web Filter extension.

November 2019

Fixes

- We've fixed an issue with the Network Computers pane (from Classroom Properties page or Create Classroom page) being empty when Microsoft disabled the "SMB 1.0/CIFS File Sharing Support" protocol in Windows 10.
